20. ABSTRACT (Continue on reverse side if necessary and identify by block number) Proceedings are reported of a symposium/workshop held at Wright State University, Dayton, Ohio during 12-15 September 1978. The symposium was sponsored by the Air Force Flight Dynamics Laboratory as part of an effort to revise MIL-F-8785B, "Military Specification, Flying Qualities of Piloted Airplanes." Flying Qualities specialists were brought together from industry, government agencies, and university. Topics for discussion were 1) experience and problems with MIL-F-8785B, 2) revisions to MIL-F-8785B currently proposed by AFFDL/FGC,

20.

3) a new format for the flying qualities requirements, and 4) future requirements in general. Full-length and informal papers were solicited to address any of the preceding topics. In addition, working sessions were organized to discuss the current revisions and future requirements from the viewpoints of different technical disciplines. This report contains the papers and summaries of the working sessions, as submitted by the authors.

FOREWORD

This report contains the proceedings of the AFFDL-sponsored Symposium and Workshop on Flying Qualities and MIL-F-8785B, held at Wright State University on 12-15 September, 1978. The papers contained herein were prepared by various authors. The report editors were Messrs. G. Thomas Black, David J. Moorhouse, and Robert J. Woodcock, of the Control Dynamics Branch of the Air Force Flight Dynamics Laboratory (AFFDL/FGC). The symposium manager was Mr Black.

This work is the interim report for the time period of August 1973 through September 1978. It was performed under Program Element 62201F, Project 2403, task 05, work unit 19.

Special thanks go to the Media Center, the Engineering Department, and to Lorna Dawes and the Office of University and Community Events at Wright State University. Their assistance and support of the symposium were greatly appreciated.

TABLE OF CONTENTS

SECTION	PAGE
I. INTRODUCTION	3
II. REMARKS	5
Major General Robert A. Rushworth, Vice-Commander, ASD	8
Dr. Walter R. Beam, Office of the Assistant Secretary	13
III. SESSION 1: A REVIEW OF THE CURRENT SPECIFICATION, ITS USES AND PROBLEMS	23
1. Evaluation of Selected Class III Requirements of MIL-F-8785B(ASG), "Flying Qualities of Piloted Airplanes;" C.C. Withers, Lockheed-Georgia Com- pany.	25
IV. SESSION 2: SPECIAL PROBLEMS 1	45
1. Task-Oriented Flying Qualities for Air-to- Ground Gun Attack; George Brandeau, Fairchild Republic Company.	47
2. Longitudinal Maneuvering Control Characteristics of a Canard-Wing Fighter Configuration; Daniel R. Cichy, Rockwell International Corporation, Columbus Aircraft Division.	58
3. Another Study of the T-38A PIO Incident; C.R. Chalk, Calspan Advanced Technology Center.	88
4. High Angle of Attack Flying Qualities and Departure Criteria Development; Gary K. Hellmann and Robert B. Crombie, 1Lt, USAF, Air Force Flight Dynamics Laboratory.	127
5. Summary of Recent Handling Quality Results at STI Pertinent to Revision of MIL-F-8785B; Roger H. Hoh and Irving L. Ashkenas, Systems Technology Incor- porated.	153
6. Flying Qualities Requirements for the AMST; Gary Gerken, Aeronautical Systems Division.	176
7. Impact of Key Flying Qualities Requirements on the YC-14/C-14 Design; E. Frank Carlson, The Boeing Company.	187
8. The Application of Equivalent Systems to MIL-F- 8785B; John Hodgkinson, McDonnell Aircraft Company.	203
V. SESSION 3: THE PROPOSED REVISION TO MIL-F-8785B, AND COMMENTS	219

TABLE OF CONTENTS (CONTINUED)	
1. A Summary of Validation Reports for MIL-F-8785B; John T. Browne, 2Lt, USAF, Air Force Flight Dynamics Laboratory.	221
2. Discussion and Status of the Proposed Revision (1978) to MIL-F-8785B; David J. Moorhouse and Robert J. Woodcock, Air Force Flight Dynamics Laboratory, and Timothy P. Sweeney, Aeronautical Systems Division.	236
3. Northrop Review of MIL-F-8785B Proposed Revision; Jerry Lockenour, Northrop Corporation.	260
4. B-1 Experience Related to MIL-F-8785B and Proposed Revisions, J.E. Campbell, Rockwell International Corporation, Los Angeles Division.	284
5. An Approach to Simplify the Specification of Low- Speed Maneuvering Pitch Control Force; Daniel R. Cichy, Rockwell International Corporation, Columbus Aircraft Division.	300
6. A Suggested Criterion for Piloted Heading Control; Roger H. Hoh and Irving L. Ashkenas, Systems Technology Inc.	313
7. Proposed Revision to the Lateral-Directional Coupling Requirements of MIL-F-8785B; C.R. Chalk, Calspan Advanced Technology Center.	338
VI. WORKING SESSIONS ON THE PROPOSED REVISION	379
Group 1: Workshop Discussion of the Proposed Revision from a Design Standpoint; Tim Sweeney, Aeronautical Systems Division.	381
Group 2: Workshop Discussion of the Proposed Revision from a Flight Test and Operations Viewpoint; Capt Ray Martin, USAF Flight Test Center.	384
Group 3: Workshop Discussion of the Proposed Revision from an Analytical Concepts and Methods Viewpoint; David J. Moorhouse, Air Force Flight Dynamics Labora- tory.	389
VII. SESSION 4: SPECIAL PROBLEMS 2	393
1. An Evaluation of Sidestick Force/Deflection Characteristics on Aircraft Handling Qualities; Stephen B. Smith and Charles B. Miller, Capt, USAF, Air Force Flight Test Center.	395
2. SIFT Pilot-in-the-Loop Handling Qualities Test and Analysis Techniques; Thomas R. Twisdale, Air Force Flight Test Center.	414
3. Effects of Control System Dynamics on Fighter Approach and Landing Longitudinal Flying Qualities; Rogers E. Smith, Calspan Advanced Technology Center.	436

TABLE OF CONTENTS (CONTINUED)		
	4. NT-33 Equivalent System Program; Rogers E. Smith, Calspan Advanced Technology Center and John Hodgkinson, McDonnell Aircraft Company.	471
	5. Shuttle Orbiter Flight Control System Evaluation; Lawrence W. Brown and Martin T. Moul, NASA Langley Research Center.	492
	6. NASA/DFRC Evaluation of Digital Flight Control System Delays Using the DFCS F-8 Airplane; Don Berry and Bruce Powers, NASA Dryden Flight Research Center.	493
VIII.	SESSION 5: FUTURE DIRECTIONS AND THE MIL-PRIME-STD	497
	1. Aeronautical Procurement - The Primary Specification System; Joseph L. Weingarten, Aeronautical Systems Division.	499
	2. Suggestions for the MIL-PRIME-STD Organization; E. Frank Carlson, The Boeing Company.	513
	3. A New Approach to Quantification of Flying Qualities Excellence; Frank M. Wilson, Jr., Lockheed-Georgia Company.	522
	4. New Criteria for Advanced Aircraft Design; Ralph H. Smith and Norman D. Geddes, Systems Research Laboratories, Inc.	545
	5. Closed-Loop Flying Qualities Criteria; Frank George, Air Force Flight Dynamics Laboratory.	574
IX.	WORKING SESSIONS ON FUTURE DIRECTIONS AND THE MIL-PRIME-STD	587
	Group 1: The MIL-PRIME-STD; David J. Moorhouse, Air Force Flight Dynamics Laboratory.	589
	Group 2: Advanced Aircraft Concepts and Controls; Martin T. Moul, NASA Langley Research Center.	592
	Group 3: High Angle of Attack Criteria; Robert J. Woodcock, Air Force Flight Dynamics Laboratory.	593
	Group 4: Flight Testing and Operations: Paul Shall, L/C, USAF, 4950 Test Wing.	603
	Group 5: Pilot-in-the-Loop Criteria Development; Frank L. George, Air Force Flight Dynamics Laboratory.	605
X.	SUMMARY AND CONCLUDING REMARKS	611
	APPENDIXES	623
A	LIST OF ATTENDEES	625
B	AFFTC PARAMETER IDENTIFICATION EXPERIENCE	629
